Lapland Meetings & Incentives, latest news from Swedish Lapland.

Imagine wide expanses of ice, deep forests, vast uninhabited wilderness areas. Imagine darkness, biting arctic cold, wild animals and the Northern Lights. Then imagine the warmth of a cheery fire and friendly meetings with people who enjoy nothing better than to give you adventure, share their culture and cuisine and offer their special knowledge. Dogsledding, ice fishing, snowmobiling, winter bathing and much, much more. Our incentive events for large and small groups let you experience all this with true passion in Swedish Lapland.

Greetings from Swedish Lapland!

Autumn is late in Lapland, but we know that winter always arrives and only varies by days from year to year. Last year we had a Aurora Borealis/Northern lights record year. Due to solar storms we seem to have another amazing winter to look forward to. We have developed a series of new products. Among these we offer snowmobiling in untouched areas but still highly comfortable accommodation and top-class dinners. Also some new cross the border safaris where you can cross one or two borders, actually experience the "Total Lapland expedition". We start in Finland, cross border to Sweden, travel to Icehotel and continue over the mountains to Norway where we cruise on the fjords. Amazing trip!

Flights

For some of our new products like cross the border tours from Finland to Sweden or Total Lapland experience where we visit total Lapland in Sweden, Finland and Norway or our Mountain safaris, please note this. Fly-car in Germany has under many years been flying all cartest engineers from

KonfAktiv

Europe to Lapland. Only in Swedish Lapland we have 4500 persons working on the next generations of cars, being tested here every winter.

They fly to Arvidsjaur from many airports in Germany. This means flight time can be shortened dramatically within Europe, with one stop within Germany. Also local transfer time is shorter. They also fly to Kittälä Finland. Suitable for the cross the border tours. www.fly-car.de

Mountain Safaris

We have three areas we operate in Lapland for these products. They cover an area similar to a large European country so it's gigantic areas. Up here on high altitude we do amazing safaris on snowmobile. Best period is mid March until beginning of May. Accommodation is offered in newly built cabins and nice restaurants. Pictures from winter 2014 safaris show a hint of the amazing beauty in the last big wilderness in Europe.

Aurora safari tours

On these tours we travel earlier in winter. It's colder in the nights and normally the Aurora can be seen more often in February and early March. We travel with snowmobiles and stay over in small and nice camps to discover the Aurora on different locations. The places we visit is perhaps the best spots to discover amazing auroras.

We stay over in really nice places with outdoor spas and saunas. They offer true and genuine accommodation and high standard toilets. After the dinner the snowmobiles are parked. We then go with dogs out in the wilderness, make a fire, enjoy warm drinks and watch the Aurora which we hope to see. To reach this areas you fly to Luleå, Kiruna or Kittälä Finland. You can do a cross the border safari to reach here, starting from Kittälä.

Cross the border safaris, two or three Lapland's Sweden/Finland or Sweden/Finland/Norway

These safaris start in the border area between Sweden and Finland, in Lapland which is the area in Northern Norway, Finland and Sweden. We offer extreme snowmobiles for these safaris. Choose among 800 cc or turbocharged 1100 cc, 170-180 Hp. We offer a variety of these tours. Shorter tours with crossing border between Finland and Sweden. Also tours where we also cross border to Norway and ending the long safari with a cruise on the Norwegian Fjords. This is a close to pure wilderness you can come, still we offer accommodation in nice hotels or cabins with high quality dinners and sauna every evening. Lunch is cooked in the wild during the safaris. You choose between daytour safaris or longer versions up to 600 km. We are in real Aurora areas during these safaris, but for more aurora see the Aurora Safaris. Discover the most wild places in Lapland and in Europe with us offering exclusive service for you and your client.

CSR, Science, research and Technical Visits

In Swedish Lapland we have one big university involved in world leading science. We have a big science park in Luleå where Facebook just finished building the servers for Europe and Asia. In Swedish Lapland ALL car manufacturers are established testing their future cars in the area. Everything inside a car or truck is tested here. Also mobile science is world leading here. The mapsystem for mobilephones was bought by Google from a local company some years ago. We have space research, aurora research, polar research etc. We also have a testfacility for new diesel fuel, friendly for environment, made of oil from the trees, Volvo is behind this. Mining, all machines needed for this, steelplants, steel research, Scania factory, crash component manufacturer and lot's of tomorrows mobile technology. You find that all here and can of course be combined with you visit. Or let's set a CSR project with the urban population, the Samis. Lapland, is wild and untouched in many ways but still a very high tech area.

Lapland Meeting & Incentives KonfAktiv is the leading DMC since almost 20 years in Swedish Lapland. We know that passion is a key factor when performing. We know that the importance of planning in combination with flexibility is the way to realize your expectations in Swedish Lapland. We often get the question, what is the difference between Finnish and Swedish Lapland. Main difference is the exclusive feeling of that guides, restaurants, hotels only focus on you and your group! One big difference is the fact that Swedish Lapland offer a coast line, a forestland and the truly high mountains. In the mountains we do safaris until late may, quite extraordinary leaving a warm pre-summer European city ending up in the snowy mountains of Sweden. Swedish Lapland is not for the masses, it's for you that wish to feel exclusive without extra costs and for you that wish to feel authentic and true passion in service!

We do car on ice activities, snowmobiling, dogsledding, dinner on ice, sami visits, high mountain safaris, visit and events at Icehotel etc. for groups up to 600 persons.

We do wish to tease you, have a look here:
